Janette Sadik-Khan,
Permanent Chair,
Global Designing Cities Initiative

SUB: GLOBAL STREET DESIGN GUIDE

In 2016, the Global Designing Cities Initiative (GDCI) produced the Global Street Design Guide. This publication represents a vision for world-class city street design that meets the goals of our city leaders and the desires of our communities. As transportation, planning, and design leaders, we find ourselves today in the midst of unprecedented change, as the demands placed upon our streets and the desires of our citizens have set in motion a new paradigm for and perception of the street itself. Many intersecting global issues—from public health to climate change to mobile technology—are together reshaping and redefining our professions, while at the same time opening opportunities for innovation that were inconceivable only a decade ago.

At a time when we are striving to react to these trends, the Global Street Design Guide offers a concrete vision for improving the safety and livability of our streets for pedestrians, bicyclists, drivers, and transit users. City streets demand a unique approach unmet by conventional design guidelines.

The guidance, vision, and flexibility articulated in the Global Street Design Guide instigate a new and important direction for cities. We see the Guide as an indispensable tool in planning modern city streets, especially as we work toward a common vision with our partners at all levels of government.

I Taufiq Balala County Executive Member, on behalf of County Government of Mombasa officially endorses the Global Street Design Guide as an integral and efficient tool for designing safe and sustainable streets and public spaces.

Thanking you,

Hon. Taufiq Balala
County Executive Member
Department of Transport, Infrastructure & Public Works
