Date 2026, March 20
Ref. 03/09

Dear Janette Sadik-Khan,

On behalf of the Ministry of Urban Development, Construction and Housing of Mongolia, I am pleased to express our strong endorsement of the Global Street Design Guide.

The Guide represents a comprehensive and forward-looking blueprint for world-class street design, contributing to the development of more sustainable, inclusive, and equitable urban communities. In today's rapidly evolving global context-shaped by challenges such as public health concerns, climate change, and growing social inequalities-there is an urgent need for innovative and practical solutions in urban planning and transport systems.

In this regard, the work of the Global Designing Cities Initiative provides a clear and actionable vision for enhancing the safety, accessibility, and livability of streets for all users, including pedestrians, cyclists, motorists, and public transport passengers. The Guide's integrated approach, combining technical guidance with adaptable design principles, offers cities a valuable tool that goes beyond conventional standards and supports resilient urban development.

The Ministry recognizes the Global Street Design Guide as an essential and effective resource for advancing safe, people-centered, and environmentally sustainable street and public space design. We highly appreciate the Initiative's leadership and contribution in this important field.

Please accept the assurances of my highest consideration.

Sincerely,

ODBAYAR OYUN
DIRECTOR GENERAL OF URBAN DEVELOPMENT,
HOUSING POLICY AND COORDINATION DEPARTMENT
MINISTRY OF URBAN DEVELOPMENT, CONSTRUCTION
AND HOUSING OF MONGOLIA
